No change since last visit of October, 1996 with the exception that the crusher, water tank and lines have been removed. Small stockpiles of uncrushed limestone have pushed down for access. Area disturbance was estimated at about 4 acres. The area continues to show no sign of erosion and no drainages have been blocked by the operation. No signs of volunteer growth in the area of the disturbance. GPS was used to establish UTM coordinates. Photos were taken of the site.
